INDICES TO VOLUME 34: 1986

AUTHOR INDEX

A

Adlakha, V. G., *see* **Kulkarni and Adlakha,** 769–781

Afentakis, Panayotis, and Bezalel Gavish, *Optimal Lot-Sizing Algorithms for Complex Product Structures,* 237–249

Amit, Raphael, *Petroleum Reservoir Exploitation: Switching from Primary to Secondary Recovery,* 534–549

Armacost, Robert L., *see* **Balut and Armacost** (OR Forum), 945–953

Assad, Arjang, A., *see* **Golden and Assad** (OR Forum), 803–810

Assaf, David, Yosi Ben-Dov and Abba M. Krieger, *Optimal Design of Systems Subject to Two Types of Error,* 550–553

Axsäter, Sven, *On the Feasibility of Aggregate Production* (Technical Note), 796–800

B

Balcer, Yves, and Izzet Sahin, *Replacement Costs under Warranty: Cost Movements and Time Variability,* 554–559

Balut, Stephen J., and Robert L. Armacost, *ORSA as Viewed by Its Members* (OR Forum), 945–953

Banker, Rajiv D., and Richard C. Morey, *Efficiency Analysis for Exogenously Fixed Inputs and Outputs,* 513–521

Bell, David E., and Peter H. Farquhar, *Perspectives on Utility Theory* (OR Forum), 179–183

Ben-Dov, Yosi, *see* **Assaf, Ben-Dov and Krieger,** 550–553

Benson, Harold P., *see* **Erenguc and Benson** (Technical Note), 650–654

Bernhardt, Irwin and Yigal Gerchak, *Socially Optimal Job Search and Its Inducement,* 844–850

Berry, Donald A., and Roy F. Mensch, *Discrete Search with Directional Information,* 470–477

Bitran, Gabriel, R., and Hirofumi Matsuo, *Approximation Formulations for the Single-Product Capacitated Lot Size Problem,* 63–74

———, **Elizabeth A. Haas, and Hirofumi Matsuo,** *Production Planning of Style Goods with High Setup Costs and Forecast Revisions,* 226–236

Boucher, Jacqueline, and Yves Smeers, *Using Column Generation Techniques for Treating Dynamic Multisectoral Models with Price-Dependent Coefficients,* 718–725

Burman, David Y., and Donald R. Smith, *An Asymptotic Analysis of a Queueing System with Markov-Modulated Arrivals,* 105–119

C

Carter, Michael W., *A Survey of Practical Applications of Examination Timetabling Algorithms* (OR Practice), 193–202

Ceder, Avishai, *see* **Psaraftis, Tharakan and Ceder,** 203–217

Chiu, Samuel S., *A Dominance Theorem for the Stochastic Queue Median Problem,* 942–944

Coffman, Paul E., Jr., *see* **Lasdon, Coffman, MacDonald, McFarland and Sepehrnoori,** 40–54

D

Daduna, Hans, *Cycle Times in Two-Stage Closed Queueing Networks: Applications to Multiprogrammed Computer Systems with Virtual Memory,* 281–288

———, *Two-Stage Cyclic Queues with Nonexponential Servers: Steady-State and Cyclic Time,* 455–459

Dhebar, Anirudh, and Shmuel S. Oren, *Dynamic Nonlinear Pricing in Networks with Interdependent Demand,* 384–394

Dirven, C. A. J. M., and O. J. Vrieze, *Advertising Models, Stochastic Games and Myopic Strategies* (Technical Note), 645–649

E

El-Deib, Hany K., *see* **White and El-Deib,** 120–129

Erenguc, S. Selcuk, and Harold P. Benson, *On the Weighted Selection Algorithm for Certain Linear Programs with Nested Constraint Coefficients,* 650–654

Ernst, Martin L, *see* **Horvath and Ernst,** 7–9

Erschler, J., G. Fontan and C. Merce, *Consistency of the Disaggregation Process in Hierarchical Planning,* 464–469

F

Falk, James E., and Karla L. Hoffman, *Concave Minimization via Collapsing Polytopes,* 919–929

Farquhar, Peter H., *see* **Bell and Farquhar** (OR Forum), 179–183

Federgruen, Awi, and Linda Green, *Queueing Systems with Service Interruptions,* 752–768

——— **and Henri Groenevelt,** *The Greedy Procedure for Resource Allocation Problems: Necessary and Sufficient Conditions for Optimality,* 909–918

——— **and** ———, *Optimal Flows in Networks with Multiple Sources and Sinks, with Applications to Oil and Gas Lease Investment Programs,* 218–225

———, **Gregory Prastacos and Paul H. Zipkin,** *An Allocation and Distribution Model for Perishable Products,* 75–82

SUBJECT INDEX

This subject index conforms to the categories established in The OR/MS Index, 1952–1976, 1976–1981. The 1952–1976 cumulative index was compiled by Kneale T. Marshall and F. Russell Richards and the 1976–1981 cumulative index was compiled by John W. Tolle and Richard E. Stone. The indices were published in 1978 and 1983 by the Institute of Management Sciences and the Operations Research Society of America.

C

Computers
Wall, Thomas Wayne, computing chemical equilibrium, 345–355
Zenios, Stavros A., vector computing, 667–682

D

Decision Analysis
Bell, David E., utility theory, 179–183
Lindley, Dennis V., analysis of errors in decision trees, 289–295
Shachter, Ross D., knowledge representation and evaluation algorithm, 871–882
Decision Analysis, Approximations
Lovejoy, William S., approximate models for policy bounds, 630–637
Decision Analysis, Inference
Hazen, Gordon B., decision from partial preference orders, 296–310
Decision Analysis, Sequential
Korhonen, Pekka, multiple-criteria optimization, 726–731
Nakai, Tōru, problem of optimal selection, 478–485

Dynamic Programming
Nakai, Tōru, optimal stopping problem, 478–485
Tamaki, Mitsushi, secretary problem, optimal selection and assignment, sequential sampling, 486–493
Dynamic Programming, Applications
Bernhardt, Irwin, probabilistic dyna... ...ming model, 844–850
Mamer, John W., optimal asset liquidation, 638–644
Sidney, Jeffrey B., scheduling precedence constraints, 606–612
Dynamic Programming, Bayesian
Shachter, Ross D., automated probabilistic inference, 871–882
Dynamic Programming, Deterministic: Discrete Time
Bitran, Gabriel R., capacitated lot sizing, 63–74
Dynamic Programming, Markov: Finite State
White, Chelsea, C., III, imprecise parameters, 120–129
Dynamic Programming, Markov: Infinite State
Lovejoy, William S., policy bounds for MDP's, 630–637
Dynamic Programming, Optimal Control
Amit, Raphael, two-phase optimal control, 534–549
Dhebar, Anirudh, dynamic nonlinear pricing with demand interdependence, 384–394
Dynamic Programming, Semi-Markov
Mamer, John W., finite horizon, continuous-time semi-Markov decision process, 638–644
Mizuno, Norihiro, shock models, 790–795

E

Economics
Hobbs, Benjamin F., linear programming models of spatial oligopolistic markets, 395–409
Sherali, Hanif D., economic equilibria, 683–697
Education Systems, Operations
Carter, Michael W., examination schedulings, 193–202
Environment, Pollution
Psaraftis, Harilaos N., optimal response to oil spills, 203–217
Errata
Green, Linda, "A Queueing System with General-Use and Limited-Use Servers," 184
Pinedo, Michael, "Scheduling Jobs with Exponentially Distributed Processing Times and Intree Precedence Constraints on Two Parallel Machines," 331
Szarkowicz, Donald S., "Optimal Control of an *M/M/S* Queueing System," 184

F

Facilities/Equipment Planning, Capacity Expansion
Keeney, Ralph L., generation expansion planning considering future technologies, 18–39
Facilities/Equipment Planning, Location
Chiu, Samuel S., location with queueing delay as objective, 942–944
Hooker, John, location on networks, 732–743
Psaraftis, Harilaos N., siting of oil spill response facilities, 203–217
Van Roy, Tony J., integer programming decomposition, 145–163
Finance, Capital Assets
Kusy, M. I., stochastic programming model, 356–376
Finance, Investment
Porteus, Evan L., quality improvement and setup production, 137–144
Forecasting
McKenzie, Ed, Winters' seasonal forecasting systems, 174–176

G

Games/Group Decisions
Zahedi, Fatemeh, group selection decisions, 883–894
Games/Group Decisions, Cooperative
Sherali, Hanif D., cooperative games, 683–697
Games/Group Decisions, Noncooperative
Dirven, C. A. J. M., structured equilibrium points for dynamic games, 645–649
Government
Bernhardt, Irwin, public policy toward unemployment insurance, 844–850
Garfinkel, R. S., census data analysis, 744–751
Kaplan, Edward H., public housing assignment policies, 832–843
Kraemer, Kenneth L., implementation and acceptance, 501–512
Riccio, Lucius J., simulation and street cleaning, 661–666
Government, Services, Police
Schaack, Christian, dispatching strategies, 257–266

I

Industries
Bitran, Gabriel R., production of style goods, 226–236
Industries, Chemical
Wall, Thomas Wayne, geometric programming, 345–355
Industries, Electric/Electronic
Hobbs, Benjamin F., electric utility deregulation, 395–409
Industries, Petroleum/Natural Gas
Guldmann, Jean-Michel, natural gas distribution, 851–863
Psaraftis, Harilaos N., optimal response to oil spills, 203–217
Industries, Textiles/Apparel
Pentico, David W., optimal design, 328–329
Inventory/Production
Axsäter, Sven, feasibility of aggregate production plans, 796–800
Bitran, Gabriel R., production with high setup costs, 226–236
Erschler, J., decision consistency in a hierarchical planning structure, 464–469
Inventory/Production Applications
Ritchken, Peter H., hedging price and quantity uncertainty with options, 864–870

Inventory/Production, Approximations
Sherbrooke, Craig C., multi-indenture, multi-echelon models, 311–319
Inventory/Production, Deterministic Models
Bitran, Gabriel R., lot-sizing under capacity constraints, 63–74
Glazer, Amihai, buyer holding and shortage costs, 613–618
Inventory/Production, Measures of Effectiveness
Porteus, Evan L., quality effect, 137–144
Inventory/Production, Operating Characteristics
Miller, Bruce L., stochastic models, 83–90
Inventory/Production, Perishable Items
Federgruen, Awi, allocation and distribution, 75–82
Swensen, Anders Rygh, perishable items, 895–908
Inventory/Production, Planning Horizons
Goldstein T., machine replacement policies, 938–941
Inventory/Production, Policies, Advertising
Dirven, C. A. J. M., state- and period-independent advertising policies, 645–649
Inventory/Production, Policies, Employment
Graves, Stephen C., setting production lead times in job shop, 522–533
Guldmann, Jean-Michel, marginal-cost pricing, 851–863
Inventory/Production, Policies, Review Interval
Graves, Stephen C., work-flow smoothing in job shop, 522–533
Inventory/Production, Stochastic Models
Dirven, C. A. J. M., stochastic games, 645–649
Federgruen, Awi, allocation of perishable items under stochastic demand, 75–82
Miller, Bruce L., operating characteristics, 83–90
Ritchken, Peter H., dynamic program for inventory order quantities, 864–870
Sherbrooke, Craig C., multi-indenture, multi-echelon models, 311–319
Stidham, Shaler, Jr., (s, S) models in inventory/production, 276–280
Zipkin, Paul H., stochastic batch production systems, 91–104

M

Marketing, Pricing
Dhebar, Anirudh, expanding networks with interdependent demand, 384–394
Mathematics
Lasdon, Leon, nonlinear programming, 40–54
Military, Antisubmarine Warfare
Morse, Philip M., origin of operations research in the United States, 10–17

N

Natural Resource Policies, Energy
Amit, Raphael, primary and secondary recovery of petroleum reserves, 534–549
Boucher, Jacqueline, multisector models by mathematical programming, 718–725
Guldmann, Jean-Michel, natural gas as an energy source, 851–863
Hobbs, Benjamin F., electric utility deregulation, 395–409
Lasdon, Leon, oil and gas production policies, 40–54
Networks/Graphs
Hooker, John, location on networks, 732–743
Zenios, Stavros A., nonlinear programming, 667–682
Networks/Graphs, Applications
Federgruen, Awi, nonlinear programming algorithms, 218–225
Feo, Thomas A., VLSI routing problems, 819–831
Harker, Patrick T., network models of spatial competition, 410–425
Shachter, Ross D., network structure to represent and solve decision problems, 871–882
Networks/Graphs, Flow Algorithms
Federgruen, Awi, augmenting path algorithms, 218–225
Networks/Graphs, Stochastic
Chiu, Samuel S., stochastic problem on network, 942–944
Fishman, George S., simulation design of experiments, 581–594
Weiss, Gideon, bounds for stochastic networks, 595–605
Networks/Graphs, Traveling Salesman
Gavish, Bezalel, Lagrangean relaxation and branch-and-bound, 698–717
Golden, Bruce L., vehicle routing, 803–810

O

Organizational Studies, Goals
Banker, Rajiv D., exogenously fixed inputs and outputs, 513–521
Kraemer, Kenneth L., managerial and political use of models, 501–512

P

Planning, Community
Zahedi, Fatemeh, multiattribute group preference, 883–894
Planning, Corporate
Keeney, Ralph L., corporate planning considering future technologies, 18–39
Probability, Markov Processes
Kulkarni, V. G., PERT networks, 769–781
Probability, Random Walk
Fryer, M. J., one-dimensional walk, 449–454
Probability, Stochastic Model Applications
Lemoine, Austin J., failure models, 320–323
Puri, Prem S., stopping times, 782–789
Production/Scheduling
Afentakis, Panayotis, production scheduling of lot sizes, 237–249
Axsäter, Sven, feasibility of aggregate production plans, 796–800
Bitran, Gabriel R., aggregate production planning, 63–74
Carter, Michael W., college examination scheduling, 193–202

Huang, H. C., processors with variable processing rate, 801–802
Ku, Peng-Sheng, two-machine flow shop, 130–136
Production/Scheduling, Flow Shop
Erschler, J., decision consistency in a two-level structure, 464–469
Ku, Peng-Sheng, stochastic processing times, 130–136
Production/Scheduling, Job Shop, Deterministic
Maxwell, W. L., scheduling cyclic production on several identical machines, 460–463
Sidney, Jeffrey B., polynomial algorithms by modular decomposition, 606–612
Production/Scheduling, Job Shop, Stochastic
Graves, Stephen C., job shop planning model, 522–533
Ku, Peng-Sheng, stochastic processing times, 130–136
Production/Scheduling, Product Design
Pentico, David W., garment design, 328–329
Professional
Magnanti, Thomas L., editorial, 2–3
Morse, Philip M., origin of operations research in the United States, 10–17
Professional, Comments On
Balut, Stephen, J., ORSA membership survey, 945–953
Professional, Obituaries
Horvath, William J., tribute to Philip McCord Morse, 7–9
Miser, Hugh J., tribute to Philip McCord Morse, 10
Programming, Fractional
Wolf, Hartmut, fractional programming, 930–937
Programming, Geometric
Wall, Thomas Wayne, chemical equilibrium, 345–355
Programming, Integer Algorithms
Afentakis, Panayotis, algorithms for optimal lot sizing, 237–249
Falk, James E., globally minimizing concave functions over polytopes, 919–929
Federgruen, Awi, greedy procedure, 909–918
Feo, Thomas, A., Lagrangian relaxation approach, 819–831
Van Roy, Tony J., cross decomposition for mixed integer programming, 145–163
Programming, Integer Algorithms: Branch and Bound
Falk, James E., implicit enumeration of vertices, 919–929
Gavish, Bezalel, traveling salesman problem, 698–717
Mazzola, Joseph B., algorithm for resource-constrained assignment scheduling, 560–572
Programming, Integer Algorithms, Enumerative
Garfinkel, R. S., set-covering algorithms, 744–751
Programming, Integer Algorithms, Heuristic
Golden, Bruce L., vehicle routing, 803–810
Mazzola, Joseph B., heuristic for resource-constrained assignment scheduling 560–572
Ronen, David, heuristic algorithms for integer problems, 164–173
Programming, Large Scale Systems
Lovejoy, William S., approximate models for policy bounds, 630–637
Programming, Linear
Hobbs, Benjamin F., linear programming models of spatial oligopolistic markets, 395–409
Programming, Linear Applications
Banker, Rajiv D., data envelopment analysis, 513–521
Erenguc, S. Selcuk, weighted selection, 650–653
Programming, Linear Parametric
Wolf, Hartmut, parametric fractional programming, 930–937
Programming, Linear Theory
Tardos, Éva, strongly polynomial algorithm, 250–256
Programming, Multiple Criteria
Korhonen, Pekka, sequential decision analysis, 726–731
Programming, Nonlinear Algorithms
Federgruen, Awi, network applications, 218–225
Federgruen, Awi, resource allocation, 909–918
Lasdon, Leon, hydrocarbon reservoir operating policies, 40–54
Servi, L. D., routing algorithm, 619–629
Zenios, Stavros A., large-scale network optimization, 667–682
Programming, Nonlinear Applications
Boucher, Jacqueline, multisector energy planning models, 718–725
Harker, Patrick T., variational inequality algorithms, 410–425
Programming, Nonlinear Theory
Federgruen, Awi, optimality conditions, 909–918
Programming, Nonlinear Theory: Optimality Conditions
Balcer, Yves, renewal theoretical models in warranty analysis, 554–559
Programming, Stochastic
Bitran, Gabriel R., production planning, 226–236
Kusy, M. I., bank asset and liability management, 356–376
Project Management, CPM
Weiss, Gideon, convex majorization of project critical path length, 595–605
Project Management, PERT
Kulkarni, V. G., exponential activity durations, 769–781
Project Management, Resource Constraints
Kulkarni, V. G., Markov processes, 769–781

Q

Queues
Kaplan, Edward H., queues in public housing, 832–843
Schaack, Christian, control of server availability in prioritized $M/M/m$ queues, 257–266
Servi, L. D., vacation models, 619–629
Swensen, Anders Rygh, queues with bounded waiting times, 895–908
Whitt, Ward, assigning customers to servers, 55–62
Queues, Applications
Burman, David Y., data communications, 105–119
Queues, Approximations
Burman, David Y., diffusion models, 105–119
Federgruen, Awi, performance bounds for systems with service interruptions, 752–768

Queues, Batch Arrivals
Fryer, M. J., computation of equilibrium distributions, 449–454
Powell, Warren B., bulk service arrivals, 267–275
Queues, Batch Service
Powell, Warren, B., bulk service queues, 267–275
Stidham, Shaler, Jr., inventory systems, 276–280
Queues, Busy Period Analysis
Levy, Hanoch, queues with vacations, 426–436
Queues, Cyclic
Daduna, Hans, nonexponential FCFS queues, 455–459
Daduna, Hans, response time distribution for successive cycles, 281–288
Queues, Deterministic
Servi, L. D., deterministic queues with vacations, 619–629
Queues, Diffusion Models
Burman, David Y., queueing approximations, 105–119
Queues, Feedback
Daduna, Hans, feedback queues in a cycle, 281–288
Queues, Multichannel
Whitt, Ward, server-selection rules, 55–62
Queues, Networks
Daduna, Hans, sojourn times in nonexponential networks, 455–459
Koenigsberg, Ernest, normalizing constants, 330
Queues, Optimization
Chiu, Samuel S., optimization involving queueing delay, 942–944
Stidham, Shaler, Jr., inventory/production planning, 276–280
Whitt, Ward, dynamic routing, 55–62
Queues, Priority
Schaack, Christian, multiple-server cutoff, 257–266

R

Reliability
Assaf, David, construction of optimal systems, 550–553
Reliability, Failure Models
Lemoine, Austin J., residual system stress, 320–323
Puri, Prem S., point processes, 782–789
Shaked, Moshe, imperfect repair, 437–448
Siegrist, Kyle, masking detection of flaws, 177–178
Reliability, Life Distributions
Weiss, Gideon, stochastic majorization of reliability system lifetime, 595–605
Reliability, Life Testing
Shaked, Moshe, life distributions, 437–448
Reliability, Maintenance
Shaked, Moshe, minimal repairs, 437–448
Reliability, Quality Control
Porteus, Evan L., lot sizing interaction, 137–144
Reliability, Redundancy/Spares
Miller, Bruce L., inventory planning, 83–90
Reliability, Replacement
Balcer, Yves, replacement costs under warranty, 554–559
Mizuno, Norihiro, optimal control policy, 790–795
Puri, Prem S., maintenance/replacement costs, 782–789

S

Simulation
Shanthikumar, J. George, simulation of renewal processes, 573–580
Simulation, Applications
Riccio, Lucius J., street cleaning, 661–666
Simulation, Design of Experiments
Fishman, George S., stochastic networks, 581–594
Simulation, Efficiency
Shanthikumar, J. George, variance reduction, 573–580
Simulation, Random-Number Generation
Shanthikumar, J. George, uniformization, 573–580
Search and Surveillance
Berry, Donald A., Bayesian statistics, 470–477
Koopman, Bernard, O., visual search, 377–383
Trummel, K. E., optimal searcher path problem, 324–327
Statistics, Bayesian
Berry, Donald A., search and surveillance, 470–477
Statistics, Data Analysis
Garfinkel, R. S., correction of erroneous data, 744–751

T

Transportation
Harker, Patrick T., intercity freight movements, 410–425
Transportation, Route Selection
Federgruen, Awi, combined inventory allocation and vehicle routing models, 75–82
Golden, Bruce L., vehicle routing, 803–810
Transportation, Water
Ronen, David, short term ship scheduling, 164–173

U

Utility/Preference, Applications
Ritchken, Peter H., purchasing decisions under quadratic rank aversion, 864–870
Utility/Preference, Estimation
Zahedi, Fatemeh, group consensus estimations, 883–894
Utility/Preference, Multiattribute
Hazen, Gordon B., consistency of partial orders with additive decompositions, 296–310
Keeney, Ralph L., multiattribute evaluation in corporate planning, 18–39
Utility/Preference, Theory
Bell, David E., decision analysis, 179–183
